If skin irritation occurs: Get medical advice/attention. · IF IN EYES: Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing. · Dispose of contents/container in accordance with national regulations. Wash contaminated skin thoroughly after handling. If eye irritation persists: Get medical advice/attention. · Take off contaminated clothing and wash before reuse.

**WARNING**

### *What is Chalk Paint® Lacquer?*

Chalk Paint® Lacquer is a robust, matt varnish with a very slight sheen for added strength. It goes on perfectly clear and dries quickly. Use it over Chalk Paint® on surfaces that will see a lot of wear – such as floors, stairs and skirting boards.

### *Get started*

Before opening, turn the container upside down to make certain the good stuff that may have sunk to the bottom is well dispersed. Give it a quick stir once opened. For best results, apply two coats. Thin your first coat with a little water and apply all over. Let the first coat dry for one or two hours before applying a second, normal coat. Leave the surface to cure overnight before use.

### *Aftercare*

Wash brushes or sponges thoroughly in water after use. To maintain your finish, use mild soapy water and avoid harsh chemicals.

Not suitable for areas of high water use such as bathrooms. Not suitable for outdoor use.

Results may vary depending on previous treatment of surface. Always test on a small area first.

Representative samples of Chalk Paint® Lacquer by Annie Sloan have been independently certified as 'toy safe' according to European standards (BS EN 71-3:2013).

### STORAGE

Always store in a cool and dry place.
